Profile

Frontend Engineer with experience in building **design systems**, **mobile applications**, and **websites**. I've worked in agile teams using methodologies like **Scrum** and **Kanban** to optimize project delivery. My focus is on **effective collaboration** within the team, **continuous research** into new technologies, and **implementing best practices** to ensure product quality. I'm seeking challenging projects that allow me to continue growing professionally.

Experience

Middle Frontend Developer - Multiplica Talent

July 2023 - Present

- Built a high-quality design system for Cementos Pacasmayo that covers different digital products (PacasPro, Ayu, Isicom, Cantera and Digou).
- Developed 25 responsive web components with Angular, Stencil.js, SCSS and design tokens, while working hand-in-hand with designers to guarantee the correct implementation of each component.
- Set up 2 pipelines to automate the upload of 3 different packages (design-tokens, stencil-library, angular-components) using Azure Devops.
- Built a custom Storybook to showcase the components and their different variants, which helped the stakeholders to have a better understanding of the components and their usage.

Software Developer - Wargos Tec

January 2022 - June 2023

- Worked on a migration from an Angular system to a React Native mobile app called Runner App built with Expo and published on the Play Store.
- Built a push notification microservice using Kotlin and Firebase Cloud Messaging.
- Reworked of auth0-inspired authentication microservice in order to centralize the login for all the projects and let the customers to enter the system with Google and Apple accounts.
- Developed an enterprise system with Next.js to enable the approval of Wargos by the Ministry of Peru, which allowed it to increase its client portfolio.
- Maintained 5 different digital products, which were developed with React and Angular.
- Built a high-quality design system with React, Webpack 5, Storybook and GitLab Package Registry, with the purpose of centralizing the main and most used components, and standardizing the design between digital products.

Web Developer - MVC Partners

July 2021 - December 2021

- Maintained a billing enterprise system for G4S Peru, which was developed with JQuery, JavaScript and Django.
- Built a course manager web for the Peruvian Society of Hematology, which was developed with Angular and Java Spring Boot.
- Implemented endpoints and stored procedures to improve server efficiency and reduce the response time of the different systems.

Education

Cloud & Digital Architect Specialist Degree - Universidad de Ingenieria y Tecnologia

March 2024 - Present

Bachelor's Degree in Computer Engineering - Pontifica Universidad Catolica del Peru

March 2017 - December 2022

Skills

General: Git, Node.js, JavaScript, TypeScript, Python, Selenium, Design Patterns, SOLID Principles, DRY principle, Clean Code, Data Structures, Algorithms, Test Driven Development, CI/CD, Scrum, Kanban, Jira, Clickup.

Frontend: HTML5, CSS, SCSS, React, Redux, Jest, Cypress, React Native, Expo, Next.js, Angular, Stencil.js, Storybook, Web Components, Tailwind, Bootstrap, Figma, SPA, SSR, SEO, Responsive Design, Atomic Design, API Integration.

Backend: Express, TypeORM, Firebase, Supabase, AWS, SQL, NoSQL, MySQL, PostgreSQL, MongoDB, Postman.

Soft skills: Teamwork, Problem solving, Continuous learning, Assertive communication, Critical analysis.

Certificates

Test Driven Development (TDD) in React JS (Jest, RTL, MSW) - Udemy

March 2024

SOLID Principles and Clean Code - Udemy

February 2024

Front-End Developer Capstone - Coursera

March 2023

Languages

- Spanish - Native
- English - Professional
